

PROFESSIONAL PROFILE

Quality & Process Improvement Specialist with 14+ years identifying shop-floor problems, finding root causes, implementing practical solutions, and leaving systems better than before in complex, high-reliability manufacturing (Motorola, Samsung, Huawei, Sony, Alcatel). Certified Auditor for ISO 9001 · 14001 · 45001, applying hands-on Lean methods (line balancing, standard work, VSM). I serve as a direct bridge between Quality, Engineering, and Production on the plant floor. In addition to process optimization, I build custom digital tools and applied AI workflows to automate repetitive tasks, ensure traceability, and eliminate manual bureaucracy. Open to relocation and international assignments.

CORE COMPETENCIES

Root Cause Analysis (RCA) · CAPA
Line Balancing & Workstation Ergonomics
Value Stream Mapping · Standard Work
ISO 9001 / 14001 / 45001
APQP · PFMEA · Control Plans
Digital Tools & Applied AI
English — B2 Professional Working Proficiency

WHAT I HAVE IMPROVED (PROBLEM → ACTION → IMPACT)

- Alcatel 4007 Line — Problem: assembly-line bottlenecks and station cycle time imbalances. Action: rebalanced Lean line operations and optimized workstation ergonomics. Impact: 17% production increase delivered while simultaneously exceeding First Pass Yield targets.
- Alcatel 4015 Line — Problem: tactical flow constraints during production ramp-up. Action: stabilized continuous process flow and cycle times. Impact: exceeded planned production by 10% while maintaining strict process stability and zero catastrophic defects.
- Samsung Microwave Line — Problem: excess labor cost and uneven workstation loading. Action: applied Lean line rebalancing and standard task reallocation. Impact: successfully reallocated 3 operator roles, lowering manufacturing labor costs without compromising reliability.
- Launch Training Model — Problem: slow operator learning curve during rapid product launches. Action: designed a peer-to-peer 1-on-1 coaching program between experienced and incoming shift workers. Impact: cut onboarding time by 2 days while achieving full required quality from day one.
- Closed-Loop CAPA Programs — Problem: repetitive defect patterns in complex electronics manufacturing. Action: led deep root-cause investigations (Ishikawa, 5 Whys) and implemented robust preventive controls. Impact: permanently eliminated recurrence of critical defects across multiple production lines.
- Global Brands Compliance — Problem: demanding, diverse technical quality requirements from international clients. Action: coordinated specifications with Asian suppliers, audited process lines, and enforced APQP control plans. Impact: 100% quality compliance delivered for Motorola, Samsung, Huawei, Sony, and Alcatel.

PROFESSIONAL EXPERIENCE

Quality Management & Continuous Improvement

May 2025 – Present · Full-time · On-site

Grupo BGH

- Leading **FAILURE ANALYSIS (RCA)** to uncover root causes and eliminate repetitive defects.
- Designing and implementing closed-loop **CORRECTIVE AND PREVENTIVE ACTIONS (CAPA)** with tracked outcomes.
- Managing control and **TRACEABILITY** of critical components throughout the production flow.
- Leading hands-on **VERIFICATION AND VALIDATION** of implemented solutions on the shop floor.
- Coordinating with **INTERNATIONAL SUPPLIERS** (Asia) for quality compliance and non-conformity resolution.
- Building lightweight digital tools to speed up diagnostics and eliminate unnecessary manual paperwork.

Integrated ISO Auditor (9001 / 14001 / 45001)

October 2022 – Present (Part-time / parallel function)

Grupo BGH

- Ensuring **CONFORMITY WITH CUSTOMER REQUIREMENTS** and expectations under **ISO 9001**.
- Evaluating **ENVIRONMENTAL MANAGEMENT** and regulatory compliance under **ISO 14001**.
- Auditing **OCCUPATIONAL HEALTH AND SAFETY** conditions and risk prevention under **ISO 45001**.
- Identifying deviations, drafting clear audit reports, and agreeing on effective corrective action plans.

Senior Process Engineer

August 2019 – February 2024

Grupo BGH

- Designing complete **PROCESS FLOWS** and applying **STATISTICAL PROCESS CONTROL (SPC)** to stabilize critical variables.
- Facilitating **HANDS-ON TRAINING WORKSHOPS** for shop floor staff on manufacturing standards and standardized work.
- Conducting **PROCESS FAILURE ANALYSIS** to prevent production deviations and unscheduled downtime.
- Developing **CLEAR WORK INSTRUCTIONS** and straightforward operational documentation.

Metrology & Engineering Laboratory Specialist

February 2017 – August 2019

Grupo BGH

- Executing high-precision calibrations under **ISO 17025** principles.
- Ensuring uninterrupted **METROLOGICAL TRACEABILITY** for production test equipment.
- Calibrating complex instrumentation: **RADIO FREQUENCY (RF) GENERATORS** and **GPS SYSTEMS**.
- Certifying functional safety test devices (e.g., **HI-POT TESTERS**) with zero tolerance for deviations.

Process Engineer — Mobile Business Unit (Global Brands)

March 2014 – February 2017

Grupo BGH

- Applying **QUALITY PLANNING (APQP)** methodologies and **CORE TOOLS** (FMEA, Control Plan).
- Performing assembly **LINE BALANCING** to maximize throughput and process stability.
- Coordinating with **INTERNATIONAL SUPPLIERS** (China) on quality compliance and component non-conformity resolution.
- Lowering **MANUFACTURING COSTS** through practical improvements at assembly stations.
- Drafting visual **WORK INSTRUCTIONS** and providing direct on-line technical support. ⚡ **Key achievements in this role:**
- **+17%** production increase on Alcatel 4007 through Lean rebalancing and ergonomics, exceeding First Pass Yield.
- **+10%** above planned production on Alcatel 4015 with zero catastrophic defects.
- **-2 days** onboarding reduction through a peer-to-peer 1-on-1 cross-shift training program.
- **-3 operator roles** reallocated on Samsung microwave line through Lean rebalancing.

NPI Quality Analyst (New Product Introduction)

May 2012 – February 2014

Grupo BGH

- Auditing launch activities to verify compliance with **ISO 9001** and **ISO/TS 16949** standards.
- Developing **CONTROL PLANS** and inspection instructions for new components.
- Participating actively in the development of **DESIGN AND PROCESS FMEAs**.
- Coordinating with **INTERNATIONAL SUPPLIERS** (China) on incoming component quality requirements compliance.
- Performing **TECHNICAL TRANSLATION** (English to Spanish) of corporate specifications.
- Drafting clear **LAUNCH TECHNICAL REPORTS** for management and global clients.

EDUCATION & CERTIFICATIONS

ISO 9001 / 14001 / 45001 Auditor
